

SUSAN WANJIRU

Nairobi, Kenya | +254 704 843 070 | susanshie316@gmail.com | [LinkedIn](#) | github.com/techyshie | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-stack software engineer with hands-on experience building and deploying production-ready web applications using Python (Flask/FastAPI), React, and PostgreSQL. Skilled in RESTful API design, JWT authentication, role-based access control, and CI/CD deployment via Vercel and Render. Completed three full-stack projects, collaborating in Agile teams using Git workflows. Actively seeking a software engineering internship to contribute to scalable systems and grow backend and frontend expertise.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frontend: React, HTML5, CSS3, Tailwind CSS

Backend: Flask, FastAPI, REST APIs, JWT Auth

Databases: PostgreSQL, SQLite

Tools: Git, GitHub, Postman, VS Code

Deployment: Vercel, Render | **Methodologies:** Agile, Scrum

TECHNICAL PROJECTS

Campus Connect [GitHub](#)

Student networking & resource-sharing platform with posts, articles, and discussions | Python · Flask · PostgreSQL · React · JWT

- Engineered a RESTful Flask backend with a normalized PostgreSQL schema, cutting query complexity and supporting multi-entity relationships across posts, users, and articles
- Implemented JWT-based authentication with protected routes and token refresh logic, enabling secure role-based access control for 3 distinct user types
- Integrated React frontend with backend APIs using asynchronous data fetching and centralized state management, resulting in a fully functional multi-page SPA
- Collaborated with a 3-developer team using Git feature branching, pull requests, and peer code reviews — maintaining a clean commit history across 50+ commits

EcoPulse [GitHub](#)

Sustainability tracking app to monitor eco-impact activities with real-time progress dashboards | React · REST APIs · Tailwind CSS · Vercel

- Built a responsive React frontend with dynamic dashboards that visualize user eco-activity data in real time using REST API integration
- Designed a fully mobile-responsive UI with Tailwind CSS utility-first classes, achieving consistent rendering across all viewport sizes
- Deployed the application to Vercel with CI/CD pipeline, enabling automated production builds on every push to the main branch

Smart Goal Planner [Live Demo](#) · [GitHub](#)

Personal finance tracker for setting, managing, and achieving savings goals | React · Tailwind CSS · CRUD · Vercel

- Architected a single-page React application with reusable component library and modular state management, reducing code duplication by an estimated 40%
- Implemented full CRUD operations for savings goals with real-time progress indicators and mobile-first responsive design
- Deployed to Vercel with live demo URL, demonstrating end-to-end ownership from development to production

EXPERIENCE

Software Development Student | Moringa School | Nairobi, Kenya May 2025 – Oct 2025

- Delivered 3 full-stack capstone projects using Flask, React, and PostgreSQL in a structured, project-based curriculum with weekly deadlines and team milestones
- Designed and shipped RESTful APIs with JWT authentication, role-based access control, and input validation across multiple production deployments

- Participated in daily Agile stand-ups, sprint retrospectives, and pair programming sessions — improving team velocity and code quality
- Maintained disciplined Git workflows with feature branching, atomic commits, and pull request reviews on collaborative repositories

EDUCATION

Full Stack Software Development | Moringa School | *Nairobi, Kenya* May 2025 – Nov 2025

Focus: Python, Flask, FastAPI, JavaScript, React, PostgreSQL, RESTful API Design, Agile Development
